

## HEALTHY AGAIN FAST

A bout of diarrhoea causes your child to lose a lot of liquids and important minerals. The risk of dehydration is particularly high with infants. The best thing is to contact your doctor directly in order to identify possible causes.

Our treatment plan for diarrhoea makes sure your baby gets better again quickly: as a first step Humana Electrolyte helps make up for the loss of liquids and minerals. Afterwards the Humana HN Special Formula will supply vital nutrients and help bowel movements to become normal again. You can use Humana Electrolyte with fennel flavour and Humana HN Special Formula from birth onwards.

Humana HN Special Formula has been a successful aid for diarrhoea and digestive ailments for over 40 years. Since then it has proven effective not only for babies but also for toddlers and grown-ups.
